

Planning Guide - Range

Measurements that are off even slightly can cost you more money and create hassle. We recommend measuring twice before making a purchase.

Need our help measuring? We offer in-house measuring surveys for only \$75.00

Measure your new range.

Measure your range width _____inches

Measure your range height. _____inches

Measure your range depth. _____inches

*** Be mindful to leave room for accessible features. (doors, handles, knobs, etc.) Allow 1/16" inch between the cabinet cutout and range on both sides. Allow at least 3 feet for the range door to fully open and to remove/insert items. Allow at least 20 inches between the stove top and cabinet above the range.**

Double check. Don't double pay.
Use this checklist as a guide to measuring the area.
